Thanks! Also, Norm, your points about how they might take it are good! I will think about how to intro it, perhaps using LEAN, saying how we've gone through an exercise on the tox review but wanted to get some input on particular areas they find helpful in the executive summary.

I've attached the executive summary for BaP...its about 7 pages...I could remove the text and just have the outline but in some ways its kinda good to see what type of information is there...what do you think??

Sounds good to me. Do you guys have any thoughts on my questions below regarding the executive summary? I can't figure out what questions would be the best to ask...

How does this agenda sound?:

1. Roll call

2. Brief updates (~5 min)
3. Seeking your Input on the content of Tox Review Executive Summaries (15 min)
4. Overview of cost-benefit project (~15 min)
5. Inorganic arsenic update (~20 min)
6. Adjourn

I was planning to send the executive summary from benzo[a]pyrene and then wanted to pose a few questions such as:

In thinking about the executive summary being very similar to the traditional IRIS Summary and with the intention to provide a summary of the major conclusions in the assessment:

- 1) What type of information is needed in the executive summary for your use of the IRIS assessment?
- 2) What level of detail is needed in the executive summary for your use of the IRIS assessment?
- 3) The current organization uses the toxicity values (i.e., RfD, RfC, oral slope factor, inhalation unit risk) as the organizing principle in terms of presenting information? Do you think following the order of the assessment starting with the qualitative hazard identification information followed by the quantitative toxicity value information would be more useful?

It would be great to send out an rough agenda this week and we can follow up with other materials on Monday or Tuesday even. For now do you want a one-line description of what you would like to talk about to add to the agenda?

Based on our discussions today about benefit-cost analysis and arsenic, we will hopefully have materials to share on Monday? Is that correct? I have some materials for the discussion about the executive summary but was wondering when you wanted that info...
